

**WaterISAC**  
Water Security Network

## **FACT SHEET**

### **2009 Free WaterISAC Pro Trial**

- U.S. drinking water and wastewater utilities that are not currently subscribed to WaterISAC and that serve fewer than 50,000 people are eligible for the trial.
- The trial is for WaterISAC Pro and is available to one person per utility, although utilities may purchase additional subscriptions anytime.
- Trial subscriptions begin upon signing up and end December 31, 2009.
- Subscribe today: go to [www.waterisac.org](http://www.waterisac.org) and press SUBSCRIBE.
- Want more info? At the address above, download a brochure and/or register for a free informational webinar for prospective and current subscribers, scheduled for most Thursdays at 1 p.m. ET. Check [www.waterisac.org/cs/webinars](http://www.waterisac.org/cs/webinars) for exact dates.

We urge you to take advantage of this offer, and we hope to have the opportunity to welcome you to WaterISAC Pro in the near future.

If you have additional questions, don't hesitate to call WaterISAC at 202-331-0479 or email [info@waterisac.org](mailto:info@waterisac.org).

## **Services**

Through e-mail and a secure Internet portal, WaterISAC Pro provides drinking water and wastewater utilities with a wide range of security information and unique online tools to help support their infrastructure protection efforts. Here is what WaterISAC Pro offers:

- An e-mail alert system providing notice to subscribers about natural disasters, terrorism threats and cyber security vulnerabilities;
- Online tools to network directly with colleagues in the U.S., Australia and Canada to share knowledge on infrastructure protection;
- Online collaboration capabilities for joint projects with colleagues;
- A searchable online library of more than 2,000 documents on security and emergency preparedness, best practices, guidance and threats; and

- A searchable chemical/biological contaminant databases created by subject-matter experts.

## **About WaterISAC**

WaterISAC was established by utility executives to provide information necessary to protect water systems and ensure continuous utility operations in the face of all hazards. It is a not-for-profit organization authorized by the U.S. Congress and funded by subscription fees, with additional support from U.S. EPA.

WaterISAC's Board of Managers is comprised of utility managers from 9 national associations: the American Water Works Association, the Association of Metropolitan Water Agencies, the Association of State Drinking Water Administrators, the National Association of Clean Water Agencies, the National Association of Water Companies, the National Rural Water Association, the Water Environment Federation, the Water Environment Research Foundation, and the Water Research Foundation.

There is no other service for the water sector remotely like WaterISAC Pro, with its comprehensive and centralized resources and its professional networking features. Since WaterISAC's debut in 2002, hundreds of drinking water and wastewater systems in the United States, Canada and Australia have made WaterISAC Pro an integral part of their security programs.
