Mr. Edward A. Boling  
Associate Director for the National Environmental Policy Act  
White House Council on Environmental Quality  
730 Jackson Place, N.W.  
Washington, DC 20503

Re: Docket No. CEQ-2018-0001, *Advance Notice of Proposed Rulemaking: Update to the Regulations for Implementing the Procedural Provisions of the National Environmental Policy Act*

Dear Mr. Boling:

The Association of Metropolitan Water Agencies (AMWA) welcomes the opportunity to comment on the Council on Environmental Quality’s (CEQ) advance notice of proposed rulemaking to update the regulations on implementing certain provisions of the National Environmental Policy Act (NEPA). AMWA represents the largest metropolitan, publicly owned drinking water systems in the nation and collectively our members serve more than 130 million people.

AMWA is supportive of NEPA as a cornerstone of our country’s environmental protection laws. It is important to our members because it ensures that possible impacts to the environment and public input related to these considerations are taken into account during federal decision making, particularly as it relates to protecting our nation’s water resources. Our members are affected by actions on federal lands that could have environmental impacts on the source of drinking water, such as projects on national forest lands, where many metropolitan cities’ drinking water originates, or projects on federal reservoirs where our members have drinking water storage contracts. NEPA plays a vital role in protecting these water sources and the larger environment by requiring the development of environmental assessments and environmental impact assessments to identify potential impacts of federal actions. While AMWA supports improving the efficiency of the NEPA process, it is important for the integrity of NEPA to be maintained and the opportunity for public participation and comment remain intact.

Our members are often applicants for projects that require NEPA reviews, such as projects for water supply and delivery that will receive funding via drinking water or clean water State Revolving Fund loans or through the Water Infrastructure Financing and Innovation Act. Many of our members have had experiences where the NEPA process has lasted several years and

therefore AMWA encourages CEQ to consider ways to optimize interagency coordination and streamline authorization decisions. AMWA supports improvements to NEPA regulations, particularly those that would improve the efficiency of environmental reviews and authorizations involving multiple agencies, provided that the decision process remains transparent to the applicant and the public's opportunity for input remains intact.

AMWA supports the administration's one federal decision goal of NEPA reviews being conducted in two years or less provided there is still sufficient opportunity for public input and recognition that some decisions may still take longer, whether due to the complexity of the project itself or the number of collaborating agencies participating. Timely, synchronized and concurrent reviews should be conducted, and to the extent possible, the lead federal agency should be responsible for ensuring this occurs.

Finally, in light of the impacts of climate change on our water resources, it's important that NEPA policies and guidelines facilitate adaptation approaches including projects developed to address future needs for resilience to extreme events and weather disasters, such as storms and droughts, which have been well documented in the United States over the past decade.

Therefore, as the White House takes steps to ensure that the federal "environmental review and permitting process for infrastructure projects is coordinated, predictable, and transparent," AMWA supports the efficiency of NEPA reviews and the Administration's one federal decision goal. As stated elsewhere in this letter, AMWA's support also assumes that the integrity of NEPA will be maintained and the opportunity for public participation and comment will remain intact. AMWA appreciates the opportunity to comment and looks forward to working with CEQ throughout this process.

Sincerely,

Diane VanDe Hei

Chief Executive Officer
